The 3-Tier Functional Diagnostic

	I Link Global	I Link International	National Operating Companies
Primary Function	IP Holding & Licensing	Strategic Mgmt & Investment Coordination	Local Execution & Service Delivery
Asset Ownership	Intangible Assets (IP, Trademarks, AI)	Equity (Shares in subsidiaries)	Physical Assets & Local Contracts
Revenue Model	Royalties & Licensing Fees	Dividends & Management Fees	Direct Sales, Grants, Trading Revenue
Market Scope	Worldwide	Continental / Regional	National (Specific Jurisdictions)

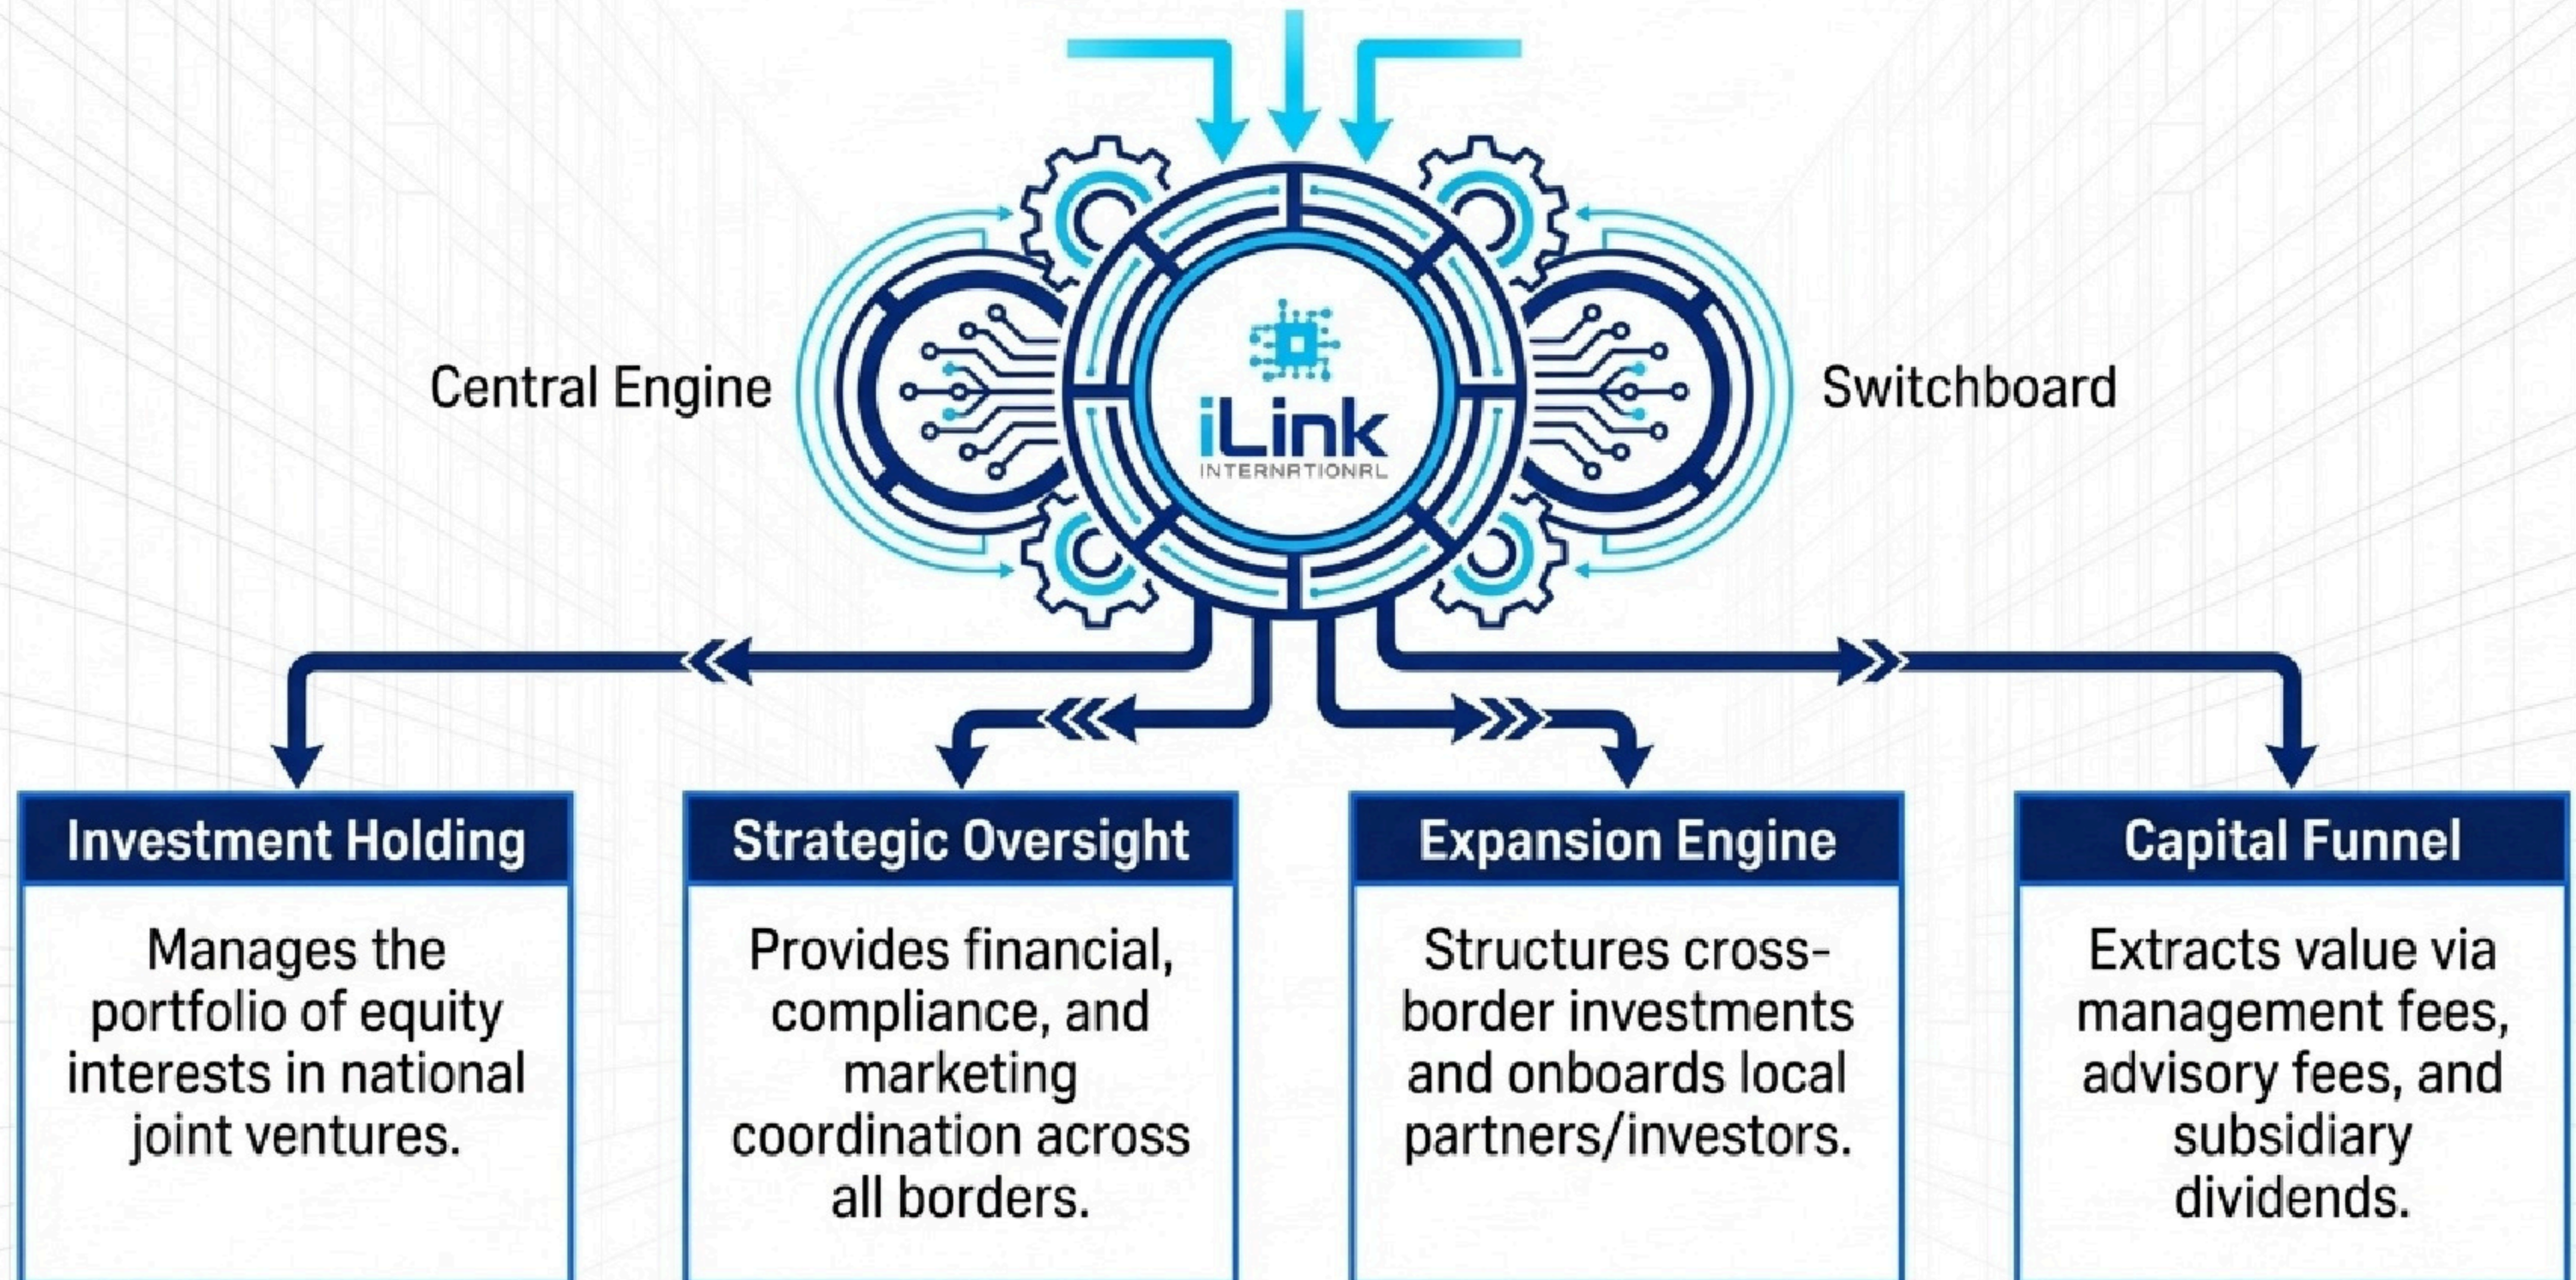

The Macro Layer: I Link Global

The IP Shield

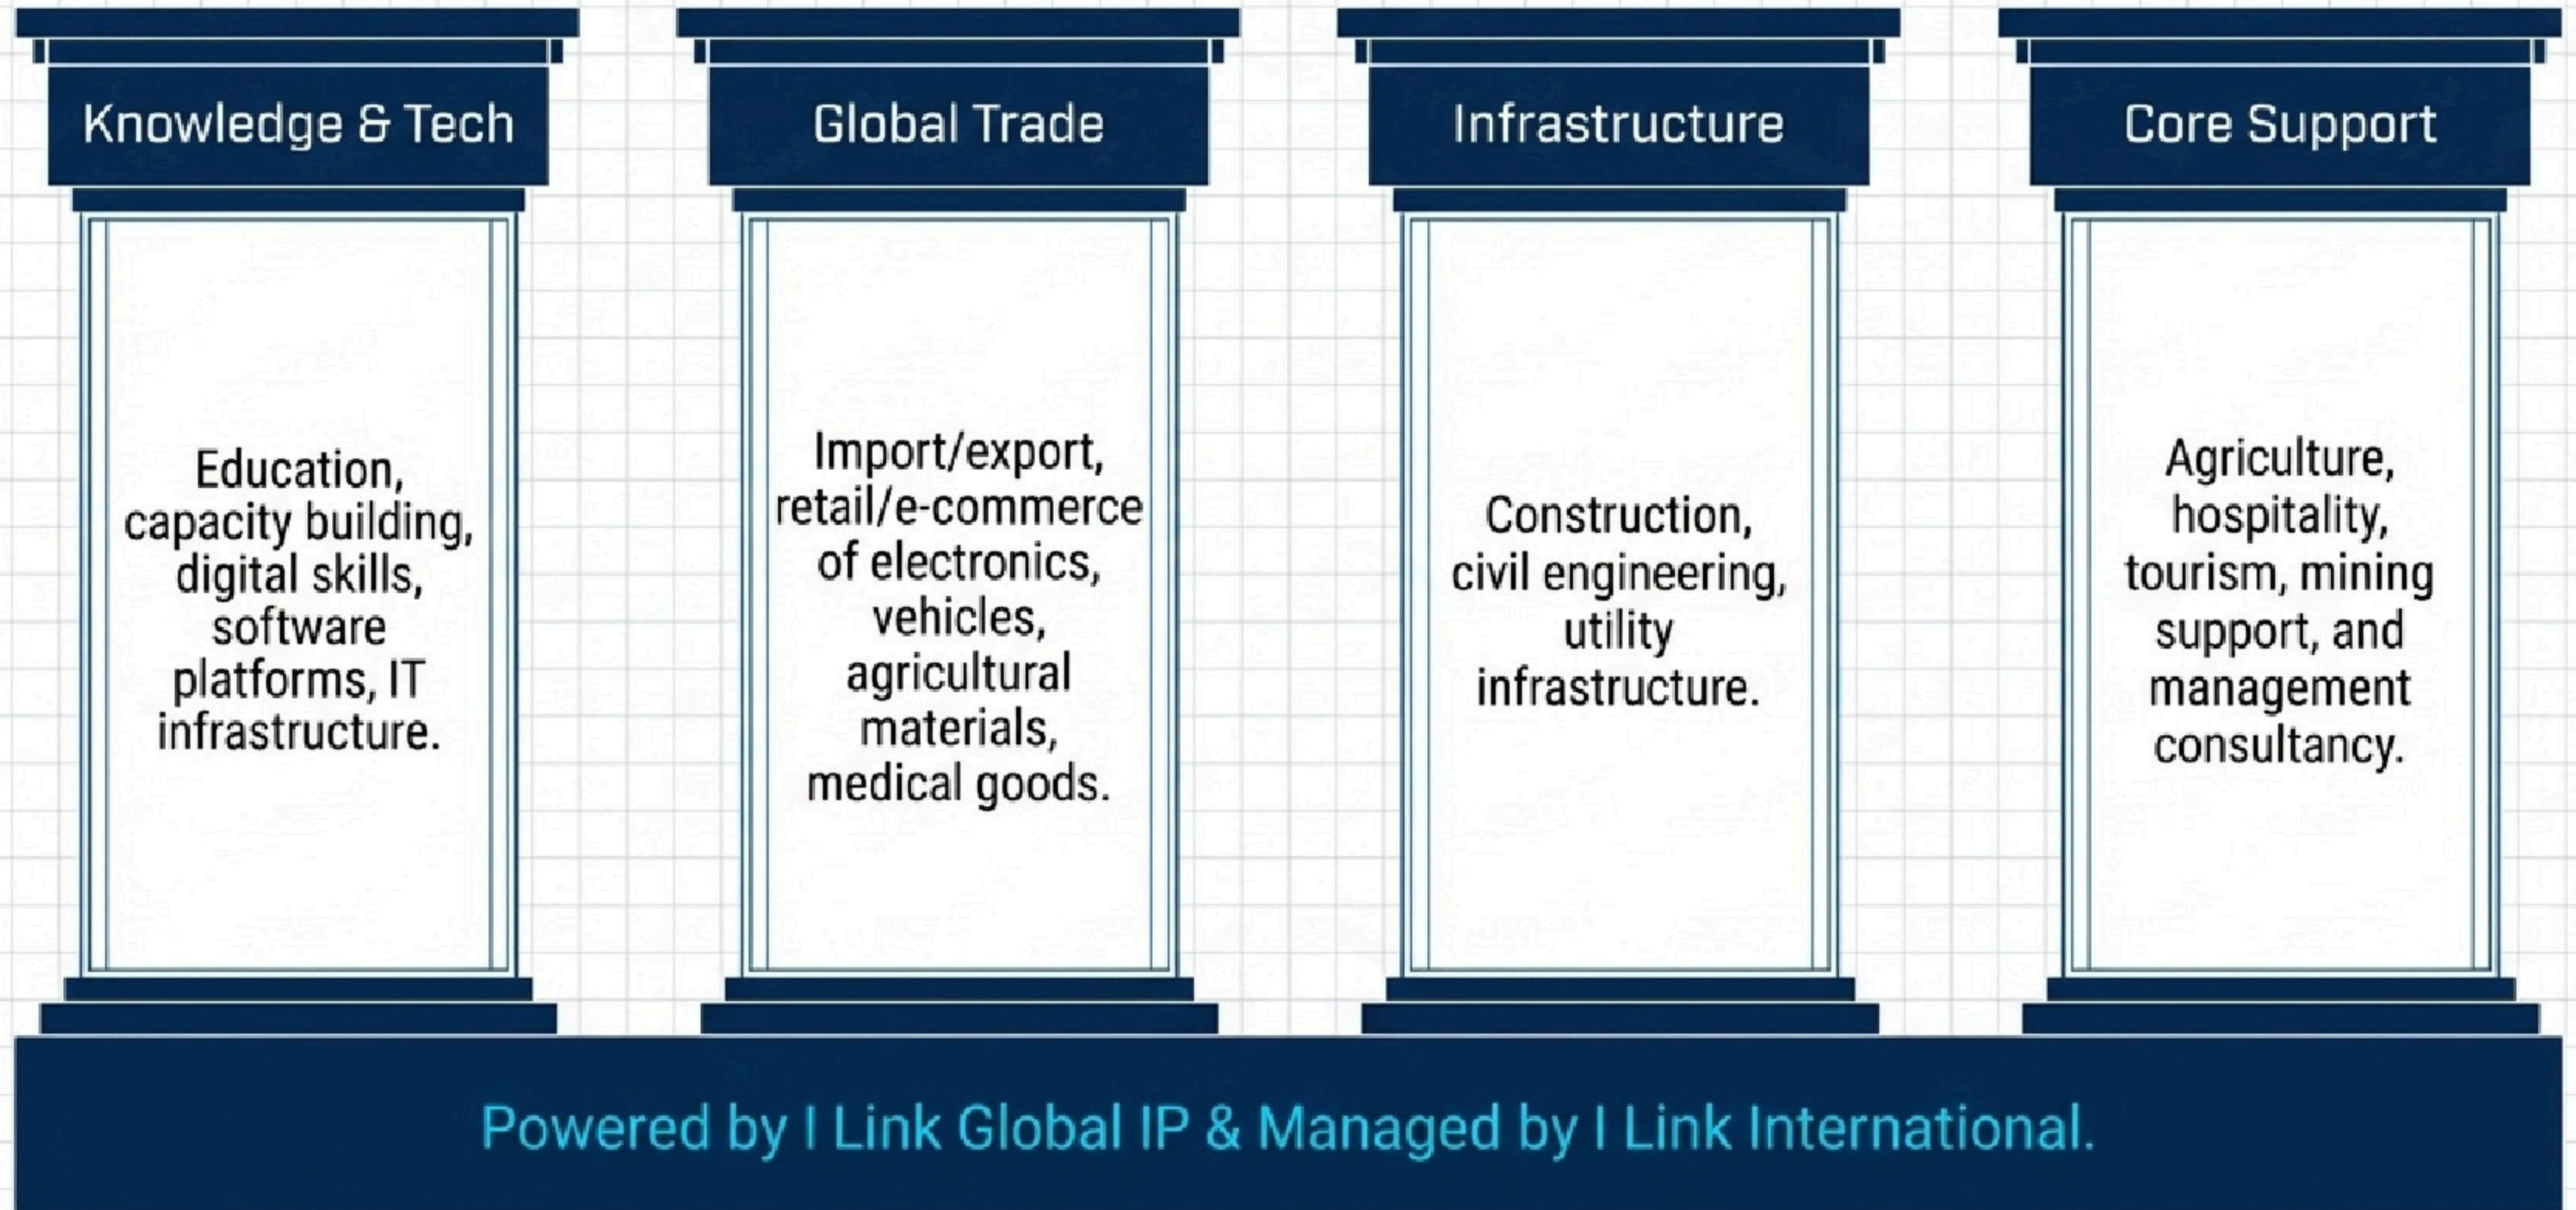

I Link Global generates revenue exclusively by licensing this protected IP to national entities in exchange for royalties.

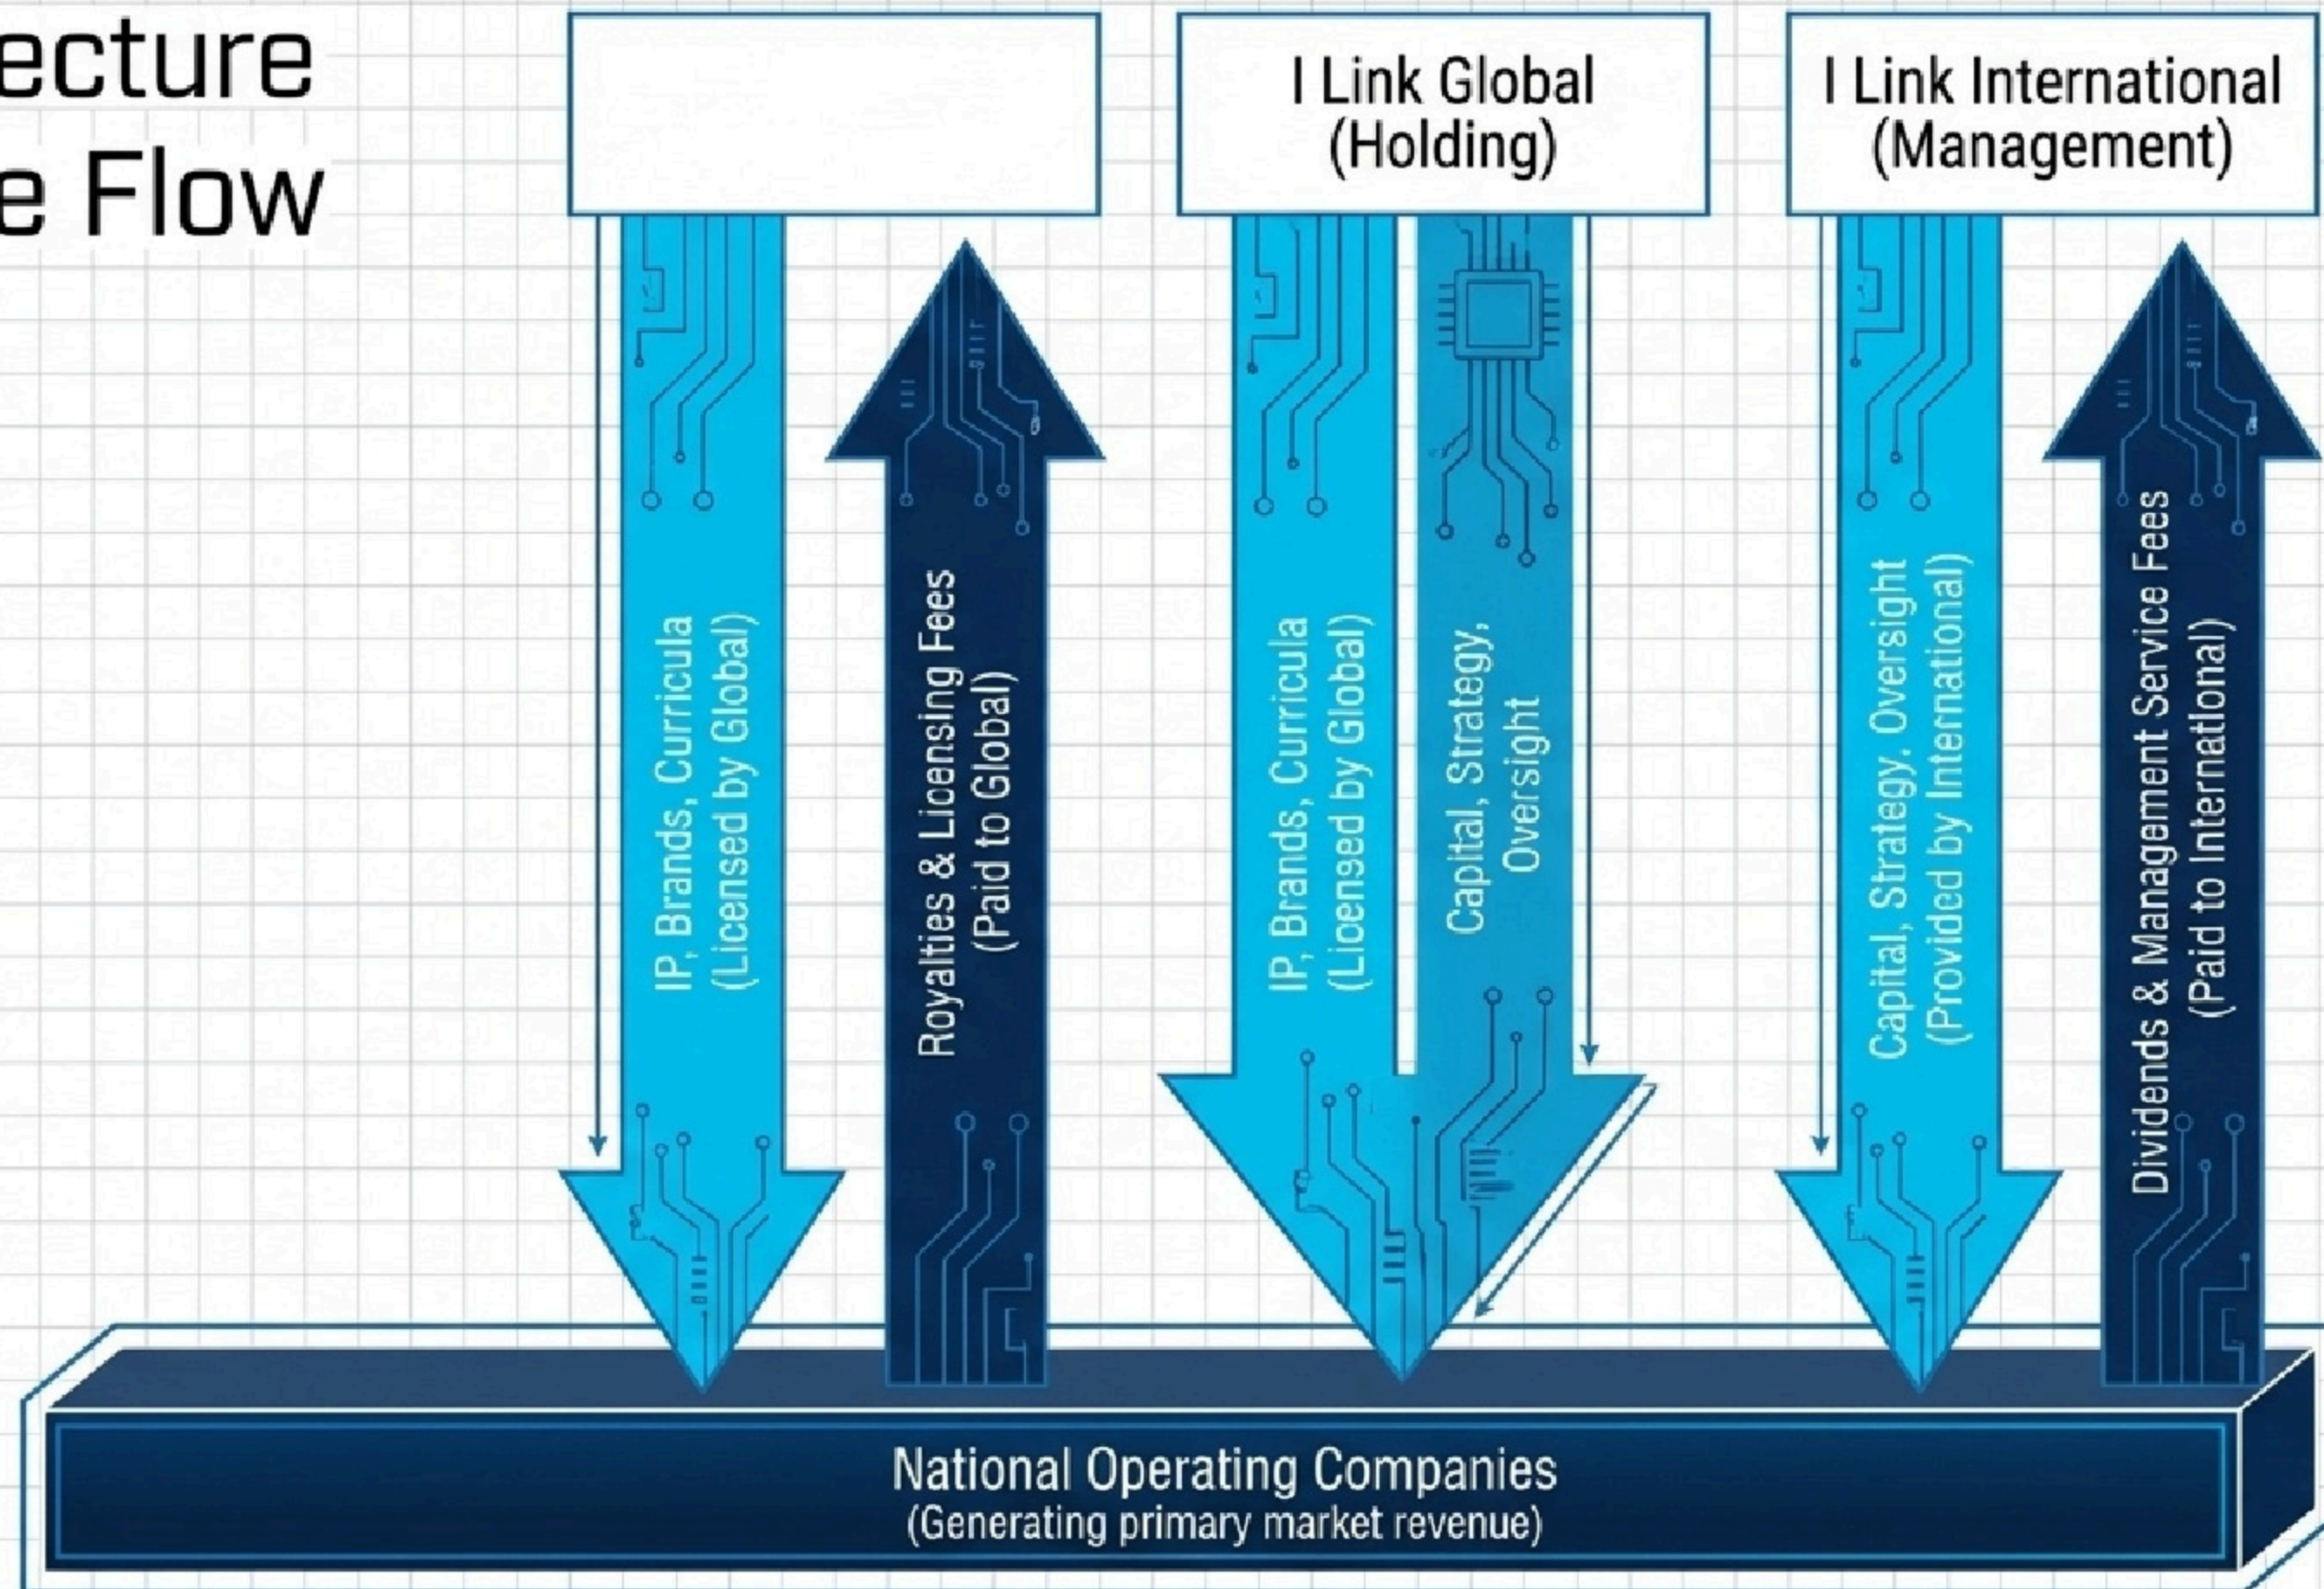

The Meso Layer: iLink International

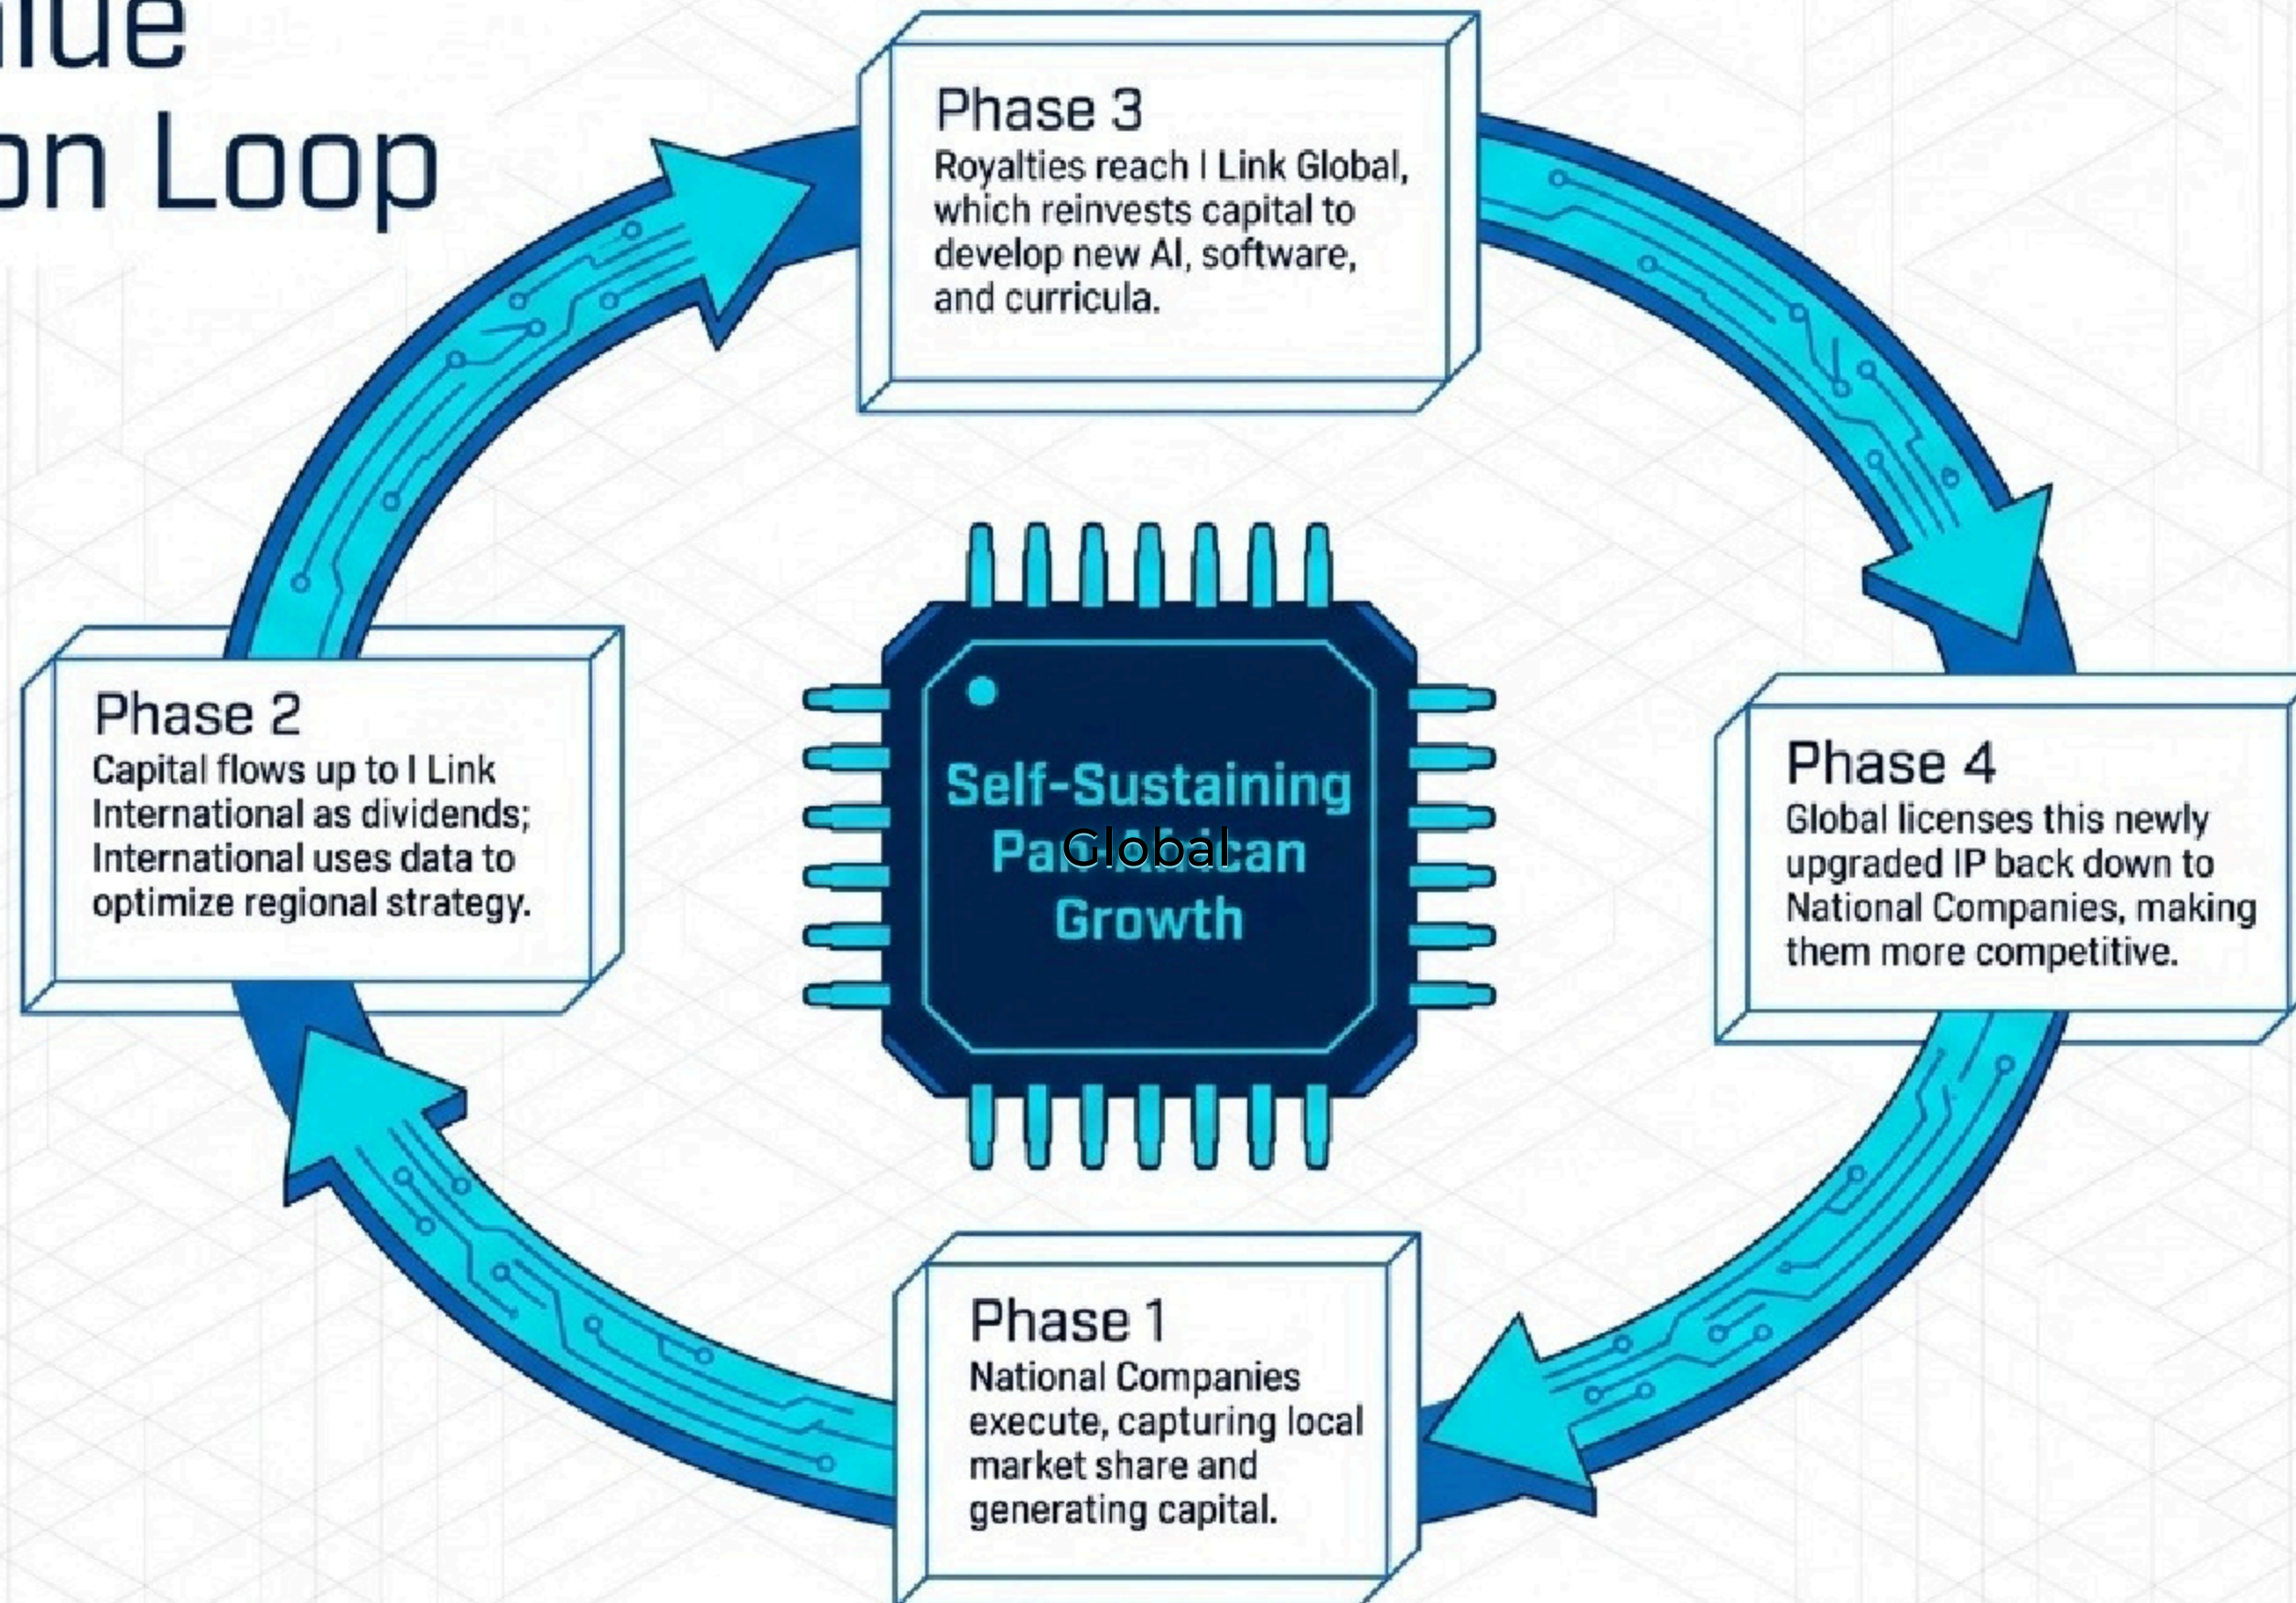

The Micro Layer: The Operational Ecosystem

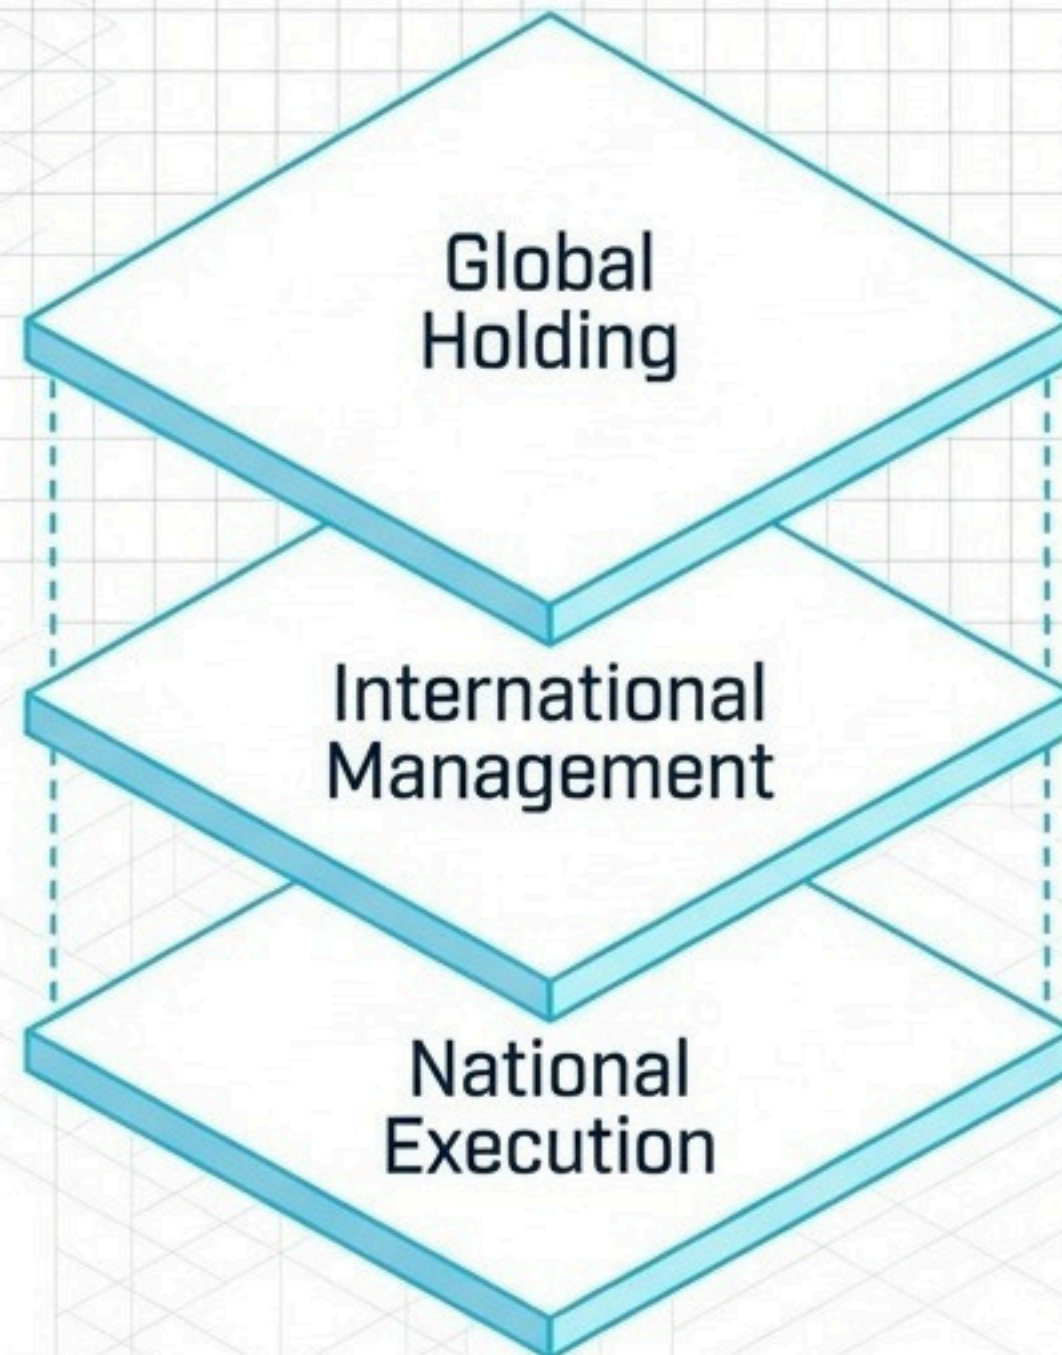

The Architecture of Revenue Flow

The Value Creation Loop

Engineered for Scale and Security

Legally Sound

Clear separation between asset ownership (Global) and operational liability (National).

Financially Optimized

Dual revenue streams ensure liquidity at the holding level while maintaining local competitiveness.

Infinitely Scalable

The node-and-spoke architecture allows rapid onboarding of new national franchises without disrupting the core.
